AN-1

The Asbestos Hazard Emergency Response Act (AHERA) of 1987 required the compilation of all asbestos containing building materials (ACBM), within public and private schools (K-12 grades). This compilation was designed to identify, not only if asbestos was present, but its location, amount, and condition. The compiled data, assessments, and recommendations along with other pertinent information was to be assembled into an Asbestos Management Plan for each school building.

AHERA also requires that asbestos materials identified in the Management Plan be checked every six months by trained school maintenance personnel and that these materials be re-inspected by accredited asbestos inspectors every three years to ensure that the materials are maintained in a safe condition. The six month surveillance and the three year re-inspections must continue for as long as asbestos remains in the building.

The Evansville Catholic Diocese has complied with the AHERA by developing Asbestos Management Plans for each of the Diocesan Schools, including Sts. Peter & Paul School.
